## New infrastructure company joins JHyM

**Japan H<sub>2</sub> Mobility(JHyM) welcomes a new member of an infrastructure developer for further development of Hydrogen station network in Japan. Now, participating companies are 18 including 8 infrastructure companies after we started with 11 companies in February.**

SEIRYU POWER ENERGY CO., LTD. joins JHyM as an infrastructure developer. SEIRYU POWER ENERGY is an energy service company close to an area in Gifu prefecture, and runs four mobile hydrogen refilling stations in Gifu. The company was recognized by Ministry of Economy, Trade and Industry (METI), as the local future leading company that drove economic development and sustainable regional community and contributed society through renewable energy.

Hideki Sugawara, Representative, Japan H<sub>2</sub> Mobility, commented:

“We are delighted to welcome such an active local company who decided to start the hydrogen refueling station business. The business model leading the local community development would expand hydrogen refilling station networks to local areas. We have invited local companies to join JHyM and developed the network together.”

Japan H<sub>2</sub> mobility, LLC, which we call “JHyM”, contributes to realize the hydrogen society and aims to develop a hydrogen station network for FCVs (Fuel Cell Vehicles) in Japan. By establishing a hydrogen infrastructure for hydrogen mobility widespread use in Japan, JHyM offers FCV drivers more convenient access to hydrogen stations.
